PROFESSIONAL SUMMARY

Full-Stack Software Developer experienced in building enterprise web applications, REST APIs, and cloud services using React.js, TypeScript, Java, Spring Boot, Node.js, and Python. Delivered large-scale service modernization at Oracle and supports a customer-facing enterprise PLM platform at Birlasoft, translating customer and business needs into reliable technical solutions. Brings hands-on experience in front-end development, automated testing, production troubleshooting, mentoring, and cross-functional delivery.

TECHNICAL SKILLS

Languages: Java (17/21), Python, TypeScript, JavaScript, HTML/CSS, C++

Full-Stack Development: React.js, Node.js, Spring Boot, Microservices, REST APIs, SQL, Angular, Tailwind, Vite

Testing & QA: Selenium, Cypress, automated UI testing, test coverage, defect troubleshooting, platform validation

Cloud & Tools: AWS, OCI, Docker, Kubernetes, Git, Bitbucket, Jira, VS Code, IntelliJ, Windchill

AI / Agent Development: LLM APIs, tool calling, prompt design, structured outputs; Python/FastAPI agent architecture

PROFESSIONAL EXPERIENCE

BIRLASOFT | **Software Engineer** | Jul 2026 - Present

- Supported and maintained the Raytheon-facing enterprise Product Lifecycle Management (PLM) platform, translating customer workflows and business requirements into technical fixes, enhancements, and reliable day-to-day operations.
- Implemented Selenium automated tests to validate PLM functionality, broaden test coverage, and reduce repetitive manual QA work.
- Partnered directly with customers to troubleshoot production issues, investigate defects, clarify requirements, and collaborate with engineering teams on platform enhancements and fixes.

ORACLE | **Software Developer** | Feb 2023 - Oct 2025

- Built and modernized Java 17+ microservices with Spring Boot and REST APIs as part of a large-scale Oracle service modernization effort, replacing legacy components and improving maintainability and reliability.
- Upgraded Java services from Java 11 to Java 17 and modernized backend APIs and dependencies, strengthening performance, security, and long-term platform support.
- Developed and supported cloud-native services across OCI using Java, Spring Boot, Docker, and Kubernetes; made implementation decisions across API changes, dependency upgrades, service health, and production incident response.
- Onboarded 100+ developers to OCI Runbooks; mentored new hires through technical onboarding and code reviews, and led technical webinars for 20+ interns and new graduates to strengthen engineering knowledge sharing.

ORACLE | **Cloud Infrastructure Intern** | May 2022 - Aug 2022

- Developed React.js and TypeScript UI components integrated with backend services for an enterprise internal web application; created wireframes and collaborated with stakeholders to validate requirements and design decisions.

ORACLE | **Cloud Infrastructure Intern** | May 2021 - Aug 2021

- Created Cypress tests for automated front-end validation; migrated legacy forms from JavaScript to TypeScript and implemented backend data-conversion logic to improve maintainability and application reliability.

GENERALI GLOBAL ASSISTANCE | **Software Engineering Intern** | Oct 2020 - Jan 2021

- Collaborated with QA on Cypress test automation for new web features; used AWS Lambda scripts to automate security key rotation.

SELECTED PROJECT

Job Tracker Agent | **In development** | **Python, FastAPI, LLM APIs**

- Designing an AI agent to interpret job descriptions, extract structured requirements, assess resume-to-role skill alignment, and generate actionable application insights using LLM prompting.
- Planned architecture combines LLM tool calling, structured JSON outputs, a FastAPI orchestration layer, persistent application tracking, and human review of AI-generated recommendations.

EDUCATION

Bowie State University | B.S. Computer Science | Dec 2022 | Bowie, MD
